For classes with any in-person interaction

IF

A student reports they have tested positive for or have symptoms of COVID-19

• Advise the student to isolate or quarantine, complete the COVID-19 Reporting Form and expect a phone call from the CT team within 24-48 hours
• Faculty should also complete the COVID-19 Reporting Form
• Faculty should notify their department chair
• All exposed individuals are expected to wear a mask

IF

A student reports a known exposure (i.e. close contact) with someone that is positive with COVID-19

For all other classes

IF

A student reports they have tested positive for or have symptoms of COVID-19 or has a known exposure (i.e. close contact) with someone that is positive with COVID-19

• Advise the student to isolate or quarantine, complete the COVID-19 Reporting Form and expect a phone call from the CT team within 24-48 hours

Follow-up by CT team until case closed. May include calls to faculty for additional information.

Details needed when reporting on behalf of a student

• Your full name and uNID
• Your call back number
• Class details
• Classroom location (or if online)
• Student name and uNID (if known)

The information will be sent to the CT team for investigation and follow-up.

COVID-19 Reporting Form: https://coronavirus.utah.edu/reporting

If you need additional assistance, please call General Campus Questions Hotline at 801 213-2874, and press 2. This form is available 24/7 to report a positive case, symptoms, known exposure or close contact.

1 Symptoms: fever, chills, new or worsening chronic cough, runny nose, sore throat, new loss of taste or smell, nausea, vomiting, diarrhea, fatigue, headache, muscle/body aches, or difficulty breathing/shortness of breath.
2 Known exposure is defined as having confirmed that an individual was in close contact with someone who has tested positive for COVID-19.
3 Close contact is defined as less than 6 feet of distance for more than 15 minutes.
4 Isolation separates sick people with a contagious disease from people who are not sick. The CT team will advise the student on how long isolation will last.
5 Quarantine separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick. These people may have been exposed to a disease and do not know it, or they may have the disease but do not show symptoms. The CT team will advise the student on how long the quarantine will last.
